

Component Irridation

UV Treatment for Commercial
Air Handler Components
The Cost Effective Mold Solution

UVMatrix-SI: Designed for quick and easy installation with flexibility for retrofits. The SI-Series is easily adapted to existing installations for retrofit. The structural design provides attachment with simple brackets and the unique (patent pending) telescoping width adjustment allows the installer to easily adjust to on-site variations in HVAC physical installation characteristics and create a perfect fit every time.

T3™ Advanced UV Lamp System
UV lamps are encased in insulating UV transparent quartz sleeves. Typically increasing disinfection power 40% over standard lamps alone...{In:T3 Lamp Optimization 'More}
